

## **DentiMints – A Powerful On-the-Go Dental Mint for Daily Oral Health**

### **Overview**

DentiMints is a first-of-its-kind chewable dental mint designed to deliver meaningful oral care benefits without the need for brushing, rinsing, or water. Ideal for people on the move — campers, travelers, healthcare workers, the elderly, individuals with special needs, or hospital patients — DentiMints provides meaningful oral care for those without easy access to a toothbrush, or for whom using a toothbrush is difficult or impractical. DentiMints combines five well-researched ingredients into a compact, brushless oral hygiene solution.

### **Key Functional Ingredients and Their Oral Care Benefits**

#### **1. Xylitol**

- Naturally reduces harmful oral bacteria
- Helps prevent plaque buildup
- Stimulates saliva for a healthier pH and remineralization
- Proven to reduce cavity risk over time

#### **2. Sodium Bicarbonate**

- Neutralizes acids produced by bacteria and food
- Balances oral pH, creating a less hospitable environment for decay
- May gently **whiten teeth by removing surface stains**
- Provides a fresh, clean feeling after use

#### **3. ExoCyan Cran® (Patented Cranberry Extract)**

- Helps prevent bacterial adhesion to teeth and gums
- Reduces plaque accumulation without killing beneficial bacteria
- Supports gum health through antioxidant and anti-inflammatory action

#### **4. Calcium Lactate**

- Provides bioavailable calcium to support **enamel remineralization**
- Reinforces tooth structure and improves resistance to acid erosion
- Complements the effects of xylitol and sodium bicarbonate for holistic enamel support

#### **5. Silica**

DentiMints, LLC

Pleasant View, UT 84414

- A mild, natural abrasive that simulates a gentle “**brushing**” effect
- Helps clean the tooth surface and remove debris
- Contributes to the overall clean-mouth feeling DentiMints provides

### **Why DentiMints Works**

Unlike typical mints that only freshen breath, DentiMints is designed to clean, protect, and support the mouth holistically. Each tablet delivers a carefully balanced dose of actives that fight plaque, reduce bacteria, restore minerals, and leave the mouth feeling fresh — without the need for water, toothpaste, or a toothbrush.

The chew-swish-spit-or-swallow format allows for use **anywhere**, making it ideal for moments when brushing isn’t realistic. Whether it’s outdoors, at work, in care facilities, or during travel, DentiMints helps maintain oral hygiene standards in between traditional brushing.

### **Conclusion**

DentiMints represents a modern solution to an overlooked challenge — maintaining oral hygiene on the go. With a formula backed by research and designed around real-world convenience, it delivers a level of oral care far beyond that of ordinary mints. Whether for outdoor adventures, aging adults, or fast-paced lifestyles, DentiMints fills a critical gap in daily dental hygiene.
